generations of business men
and standing for every move-
ment to build up and better
this community.

3 Per Cent Interest on Time Deposits.

THE THRICE-A-WEEK EDITION OF THE NEW YORK WORLD

IN 1917

Practically a Daily at the price of a Weekly. No other newspaper in the world gives so much at so low a price.

The value and need of a newspaper in the household was never greater than at the present time. The great war in Europe is now half way into its third year, and whether peace be at hand or yet be far off, it and the events to follow it are sure to be of absorbing interest for many a month to come.

These are world-shaking affairs, in which the United States, willing or unwilling, is compelled to take a part. No intelligent person can ignore such issues.

THE THRICE-A-WEEK WORLD'S regular subscription price is \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and the

HOPKINSVILLE KENTUCKIAN

(Tri-weekly)

together for one year for \$2.65. The regular subscription price of the two papers is \$3.00.

L. & N.

Time Card

Effective Apr. 15, 1917.

TRAINS GOING SOUTH.

No. 93—C. & N. O. Lim. 12:21 a. m.
No. 51—St. L. Express 5:29 p. m.
No. 95—Dixie Flyer 9:32 a. m.
No. 55—Hopkinsville Ac. 7:00 a. m.
No. 53—St. L. Fast Mail 5:36 a. m.

TRAINS GOING NORTH.

No. 92—C. & St. L. Lim. 5:29 a. m.
No. 52—St. Louis Express 10:20 a. m.
No. 94—Dixie Flyer 7:05 p. m.
No. 56—Hopkinsville Ac. 8:55 p. m.
No. 54—St. L. Fast Mail 10:14 p. m.

No. 51 connects at Guthrie for Memphis and points as far south as Erin, and for Louisville, Cincinnati and the East.

Nos. 53 and 55 make direct connection at Guthrie for Louisville, Cincinnati and all points north and east thereof.

No. 93 carries through sleepers to Atlanta, Macon, Jacksonville, St. Augustine, and Tampa, Fla. Also Pullman sleepers to New Orleans. Connect at Guthrie for points East and West. No. 93 will not carry local passengers for points north of Nashville, Tenn.

W. N. CHANDLER, Ticket Agent.

Retarded Bliss.

Said the near-cynic, "By the time a man is in position to live on Easy Street, he has just about lost all interest in living anywhere."

Institutional Treatment of Tuberculosis

means that the patient is given constant attention; that the regime which is found to be best adapted to the case is rigidly adhered to; that a resident physician is at hand all of the time, studying the case and adapting the treatment to it; that nursing service is the best. All of these things mean improvement, greater comfort and possible recovery. Hazelwood is operated without profit by the Louisville Anti-Tuberculosis Association. Rates \$12.50 a week. Write for detailed information.

Hazelwood Sanatorium

Station 2 DR. O. L. MILLER, Physician in Charge LOUISVILLE, KY.

King Names British Premier.
The premier or prime minister of Great Britain is nominated by the reigning sovereign, to form a cabinet and organize the government. The appointment of a premier does not have to be confirmed by parliament, but no prime minister could carry on the government of the country for any length of time who did not possess the confidence of the house of commons. He selects his colleagues or other members of the cabinet, and his resignation dissolves the ministry. Members of the British house of lords hold their seats by virtue of hereditary rank and titles, some of which were conferred by sovereigns hundreds of years ago. Canada has no representative in the British parliament. It has a parliament and government of its own with a governor general, appointed by the king of Great Britain.

Price, One Bottle.
The movie, or "cinema" as it is called there, has become an extraordinary social influence in England. In the villages which have grown up around the "coal-pits," in which many of the houses consist of only one room, and lack all the evidences of civilization, one can always be sure of finding a public house and a "cinema." Some of the proprietors of these cinemas do not charge a coin for admission in the case of children. Instead of money, the child presents a bottle, which is sold to the manufacturer of liquor, and afterward returned to the public house of the same village, to begin again its round to the parent of the child, to the movie, to the distillery and back to the saloon.—Christian Herald.

First Bombing Balloons Futile.
The first bomb dropping balloons were humble enough and equally futile. Balloons had been used in war as early as the siege of Maubeuge by the Austrians for observation purposes. The first talk of bomb dropping was in 1912, when the Russians were said to have had a huge balloon for that purpose; but nothing was done with it. In 1917, however, the Austrians, when attacking Venice, sent up paper fire balloons, which were to drop bombs into the town. But they forgot to allow for contrary air currents. The balloons got into such a current and, drifting back over the Austrian line, bombed them, instead of Venice.

President's Flag.
It is usual in other countries to have a special ensign to designate the presence on a vessel of the ruler of the nation. President Arthur suggested such a flag in the United States in the early part of 1882, and, as his cabinet concurred in the suggestion, decided on the design of a blue ground with the arms of the United States in the center. The navy department ordered that this flag should be displayed at the mainmast of any vessel that bore the president. Arthur first used it in 1883.

A Patch on the Wall.
If your wall paper is disfigured by a stain that cannot be removed, procure some of the same paper and roughly tear from it an irregular patch, which is a little larger than the stain to be hidden. Carefully paste this patch over the stain. The irregular, torn edge of it will almost defy detection.

DEMOCRATIC SPEAKING

At the Court House,
IN HOPKINSVILLE, KY.,

Monday, Oct. 1, 1917

AT 1:30 P. M.

THE DEMOCRATIC NOMINEES FOR COUNTY OFFICES WILL MAKE
THEIR OPENING SPEECHES ON THIS OCCASION, AND ALSO

THE HON. JOHN C. DUFFY,
Assistant Attorney General, will speak in
behalf of the Democratic Ticket

This will be a meeting of great importance
to the people of Christian County, and the
public is CORDIALLY INVITED.

LOW JOHNSON,

Chairman Democratic Campaign Committee.

Ink for Labeling Bottles.

In a small bottle place an ounce and a quarter of methylated alcohol, add a half-ounce of shellac, and when this last is dissolved immerse the bottle in hot water until the solution is warm. Then add slowly, while stirring rapidly, a solution composed of one hundred and fifty grains of borax dissolved in two ounces of water. Finally add coloring matter to suit, four or five grains of methyl violet being satisfactory and dissolving well upon shaking. This makes a very fine waterproof ink for writing the labels upon bottles and for other purposes about the darkroom.

Dear Old Husband.

The superstition about the word "husband" is not yet slain. Recently a philologist went into a church and heard a young curate discourse on marriage. "Think," he said solemnly, "of the beautiful idea underlying the word 'husband'—husband, the bond or bond of the house." The philologist had difficulty in restraining himself from laughing aloud. The "bond" of the word "husband" is merely a corruption of the Scandinavian "bonde," a peasant.—Exchange.

Distorted.
Escort (at sex play)—Doesn't the author of this drama hold the mirror up to nature?

Girl—Yes, but nature seems to be making up an awful face, or else the glass is crooked!—Town Topics.

Partially Concerted.

Jenks—How do you stand on the selective draft?
Jinks—Well, I'm strong for them, but some of my drafts, for the matter, are in honor.—Judge.

ENGINE BUILT LIKE A WATCH

Fast, Modern Airplane May Readily
Cost From \$10,000 to \$20,000 and
Wears Out Quickly.

The engine of your motor car weighs from 500 to 1,200 pounds, or more. It will average from 20 to 30 horsepower at the lowest, says a writer in Collier's. The new airplane engines run less than three pounds per horsepower and the finest of them two pounds or less. Airplanes have been built with air-cooled engines for short-distance, fast scouting whose engines weigh less than a pound and three-quarters per horsepower. They must be quite literally, as an old advertisement used to say, "built like a watch."

At present a high-powered airplane engine of the best type—say 120 to 150 horsepower—cannot be purchased for much less than \$3,000. And the whole airplane, a big one, may readily cost \$10,000 to \$20,000. You can readily see why the construction of only 15,000 airplanes, as in England's program, would easily equal, for a total expenditure for men and camps and hangars and repairs and wastage, more than half a billion dollars.

A fast modern airplane has an average life of only about two or three hundred hours of active service—say two months at the outside. This means that to keep 10,000 airplanes on a battle line you have to be able to build 5,000 per month or more. The cost would be almost unthinkable. That is why warfare in the air for any length of time would bankrupt the world. And that, in turn, is why warfare in the air means the end of all warfare.

SHIP NEED OF AUSTRALIA

Grain of Little Value Without Transportation, as Little of It is Used at Home.

"Australia's food production this year will average normal; it is neither unusually heavy nor light, but there is going to be considerable difficulty in handling the crops, because there are no facilities for transportation," said H. W. Stephens, a merchant of Melbourne, who was visiting the United States. "The greatest need of Australia today is transportation. Until ship tonnage is provided it is almost useless for the farmers to complete their harvesting, as it requires only a small percentage of the crops to supply the domestic needs. Heretofore great quantities of grain have been shipped to England and it is still going overseas, but in not sufficient quantity, for England needs wheat now as never before. But without ships it is impossible for us to send our wheat abroad."

"The wheat crop of Australia was damaged to some extent by mice, and until the farmers learned how to combat this pest it threatened to become a serious menace. The farmers used poison, water, gas and other means, and finally got rid of them."

An Unkind Cut.

"I visited the office of the High-brow Magazine the other day," said the poet, "and I never saw such beautiful waste-paper baskets, all decorated with pink ribbons." "So that your lines may be cast in pleasant places, eh?" said the mean man.

Apples Valuable as Food.

Apples should be used in our diet as often as possible. They are easily obtained, reasonable in price, lend variety to the menu and are of value as a food and as a preventive of disease. Nothing in all our varied and fascinating range of fruits holds quite the same quality and qualifications as the apple. The more apples we add to our dietary the clearer brain and cleaner skin we are likely to have. A new, ripe apple at its best is digested in 85 minutes.

Exhibition and Exposition.

While the two words, exhibition and exposition, in modern usage when applied in the sense of a public show or display of natural or artificial productions, are used interchangeably, yet in some cases the words could not be used interchangeably without altering the meaning of both phrases, as an "exhibition game of ball" conveys an idea very different from that contained in the phrase "an exposition game of ball." As contrasted with exposition, exhibition deals more often with visible things and exposition with things mental; as an exhibition of machinery; an exposition of a text or doctrine of philosophy. Hence in part, perhaps, the disinclination of some to the word exposition for a show.

First Circular Saw.

According to British technical publications, the first circular saw was invented by one Murray, a wood turner at Mansfield, England. The first saw of this kind was about six inches in diameter and was used on a wood turning lathe operated by water power.
